IDENTIFY INVENTORY ERRORS UPSTREAM

BEFORE THEY BECOME COSTLY PROBLEMS DOWNSTREAM

eyesee

> EYESEE automates your stock counting and stock control operations thanks to a complete solution, quick and easy to implement

Improve safety by reducing the risks associated with working at height

Increase your productivity:
a 10x faster inventory process

Reduce the material,
human and financial resources
required for inventory

No more warehouse downtime.
Maximize your operations

THE SOLUTION

EYESEE Drone - An autonomous drone
- Autopilot
- 3 ZEBRA barcode readers
- Camera (real time video feedback and HD photo taking)
- 360° anti-collision sensors and obstacle detection

+

EYESEE App - A tablet application for mission management and real-time video feedback.

+

EYESEE Cloud - A Cloud administration tool to manage mapping, data processing, reporting or even the management of a drone fleet.

MORE EFFICIENT THAN MANUAL INVENTORY

60s | 6s

Scan your pallets in racks more than 12 meters high

Collect reliable inventory data

Deploy the solution in a few days, without modifying the warehouse or adding fixed infrastructure

Compatible with all WMS and ERP systems

The EYESEE solution can scan an average of 500 locations per hour
